

# **Technology and Society**

---

Learning Outcomes Approved 25 April 2005

## **Learning Outcomes**

Students will demonstrate:

1. Understanding of what is meant by "technology" within the context of the course.
2. Understanding of current or past societal challenges that crucially involve scientific and/or technological issues.
3. Understanding of the interaction between social, cultural, ethical, political and/or economic considerations and the development and adaptation of technologies
4. Ability to evaluate the intended and unintended consequences of the use of science and/or technology.
